

## Available Content

- 6 collections of mathematical learning content
- 7 languages (English, German, Spanish, French, Dutch, Finnish, Hungarian)
- 9 pre-assembled bridging courses
- 100 test questions
- 600 mathematical concepts
- 1500 examples
- 2500 interactive exercises
- 10000 learning objects

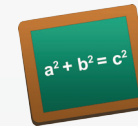

## If you are a Math student

- Learn what you need with the Math-Bridge adaptive course generator
- Learn interactively with Math-Bridge dynamic exercises
- Learn towards mastery with Math-Bridge tracking your progress
- Learn in several languages and perfect your mathematical vocabulary

## If you are a Math teacher

- Choose from a set of pre-assembled courses
- Assemble your own courses from available content collections
- Extend your courses with automatically generated exercises
- Adapt your courses to the needs of your students
- Provide your courses in several languages
- Build online tests that are automatically evaluated
- Track your students' progress

## If you are a university representative

Become an associated partner and get access to Math-Bridge services:

- Online bridging courses
- Content encoding using Web-standards
- Platform for content sharing
- Local installation or hosting
- Server management and technical support
- Training for students, teachers, authors and administrators
- Statistical evaluation of bridging courses
- Integration of Math-Bridge with your LMS (Moodle, Ilias and CLIX)
